

Common Stickers Found on Walk-In

RSG for both Norlake & Master-Bilt utilize the following stickers for identification of the walk-in:

1. Serial Number Tag – This number references the Sales Order # for this project. **(RSG Tech Support and Inside Sales need this number to access the order)**
2. Panel Number Tag – This number should match the number on the drawing layout received with the order **(Inside Sales needs this number if replacement is needed or questions regarding a specific panel)**
3. Compressor serial number – This number is not needed from the field unless tech. support specifically is requesting it.
4. UL Sticker – Used to show inspectors that we meet UL guidelines

****NOTE**** Serial Number Tag could be located next to the interior light on certain doors. Panel Number Tag color may vary

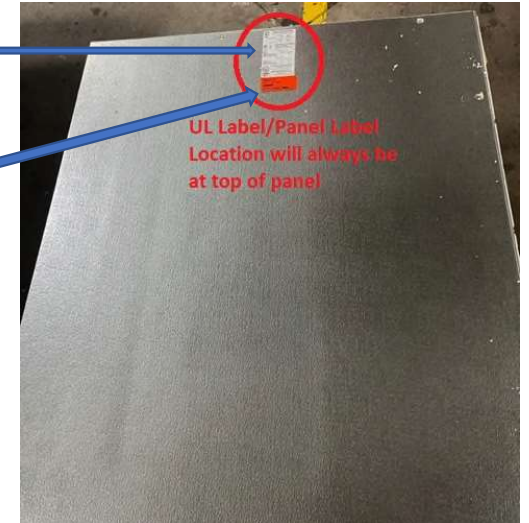

Serial Tag #

Serial Tag Location

UL Sticker

UL Label/Panel Label Location will always be at top of panel

Panel #

Compressor serial #

Bottom half of this sticker gets attached to our paperwork

2nd Panel Label Location
